

Wall Paper and Band Photo Req.

*note this does not create the wallaper itself,
only what we need to convert to a wallpaper compatible format

1. You will need a photo editor program such as (PC) StudioLine Photo Basic 3.3 (FREE) - <http://www.studioline.biz/EN/downloads/photo-basic/default.htm>. Mac users we recommend iPhoto which comes free with most Mac's - www.apple.com.
2. Open the image in the program and resize/crop the images to the following...

band pics = 100x100(pixels)

wallpapers = 320x320(pixels)
3. Save the image format as a .jpg
4. Upload your content to our servers via the signup process or once you have logged into your Myindietones.com artist account.
